manufactus develops innovative software solutions to optimize processes in the area of production and logistic.

Since more than 10 years manufactus is one of the leading providers of electronic Kanban systems.
Our **e-Kanban system IKS** (Integrated Kanban System) is used by many sucessful companies worldwide. The IKS system supports internal Kanban loops but also the integration of external suppliers.

Why not starting with electronic Kanban?

Before you can start with the implementation of a Kanban system, you have to answer a very important question: Starting with a manual Kanban system or supporting the Kanban processes by a Kanban software tool, which has been developed especially for such Pull systems?

Of course, this is a question of philosophy and also the manufactus team members know about the learning effect by a classic Kanban system.

But I think everybody recognizes the benefits when all Kanban information, like master data and calculation data, as well as all finally designed Kanban loops are provided on a stable standard platform like IKS. This is the basis to print all Kanban cards fast, easy and without any efforts.

If you are starting with simple (manual) processes or if you are using the power and helpful functions or our e-Kanban system IKS since from the beginning (like tracking of Kanban movements, use-and-throw-away Kanban cards, electronic Kanban Board etc.), is depending on the already realized processes and the philosophy of the company.

By using IKS you will start to create a stable basis for the further extension of your Kanban system and for the continuous improvement of your processes, definitely!

We offer with our **IKS Small Business Edition** a lean and low-cost starter solution which is perfect for small companies but also for a first e-Kanban pilot area.
You will be surprised about the huge benefits of our smallest e-Kanban package!

Are you interested in more information?

Please contact us under +49 8151 - 909340 or
send us an Email (contact@manufactus.com). We will be glad to help you!

You will find more information about our IKS Editions **here**.

Best regards,

Daniel Gross
