

Smart Kanban

The solution for manual Kanban

Your company wants to implement a classical manual Kanban System and is searching for an easy and economic solution to define the Kanban loops, to calculate the correct number of Kanbans and to print Kanban cards easy and fast?

We are offering exactly the right solution for you!

SMART KANBAN

Initial situation

- > Your company has decided to control the material flow via Pull System
- > Therefore supermarkets will be created and Kanban Loops will be defined
- > At the beginning the processes should be managed by a "manual Kanban System"
- > Now the question comes up: *What is the easiest way to manage all Kanban data, to define Kanban Loops und to print Kanban cards?*
- > A low-priced and easy-to-use solution is on top priority
- > Options are using Excel-Spreadsheets or developing a self created system based on a MS Access Database

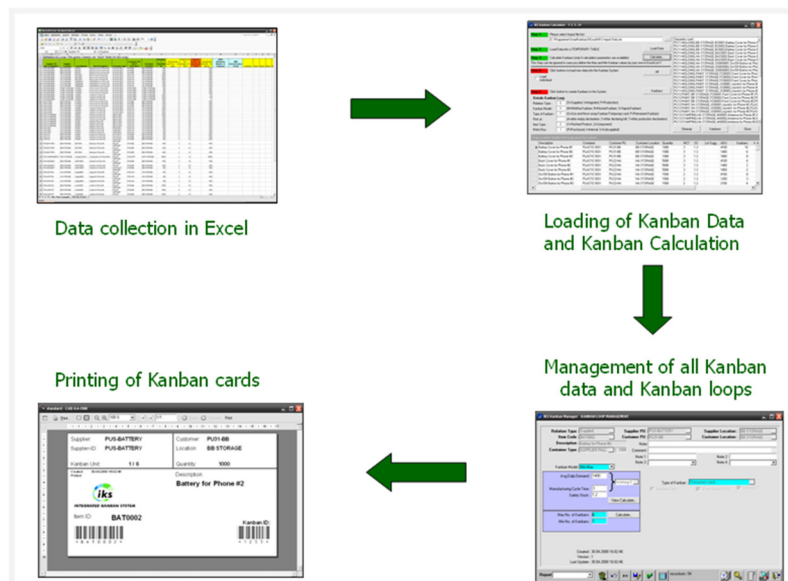

manufactus Smart Kanban

- > An easy-to-use software package, which allows the fast and efficient implementation of a manual Kanban System
- > Supports data collection in pre-defined Excel-Sheets
- > Allows fast and uncomplicated loading of data into a database
- > Helps to define and calculate your Kanban Loops
- > Allows easy and fast printing of Kanban cards (standardized formats in different layouts)
- > Guarantees an easy and stable management of the Kanban data in operations

You are only one step away from an electronic Kanban System

- > All Kanban master data are already stored in the database
- > All Kanban loops are defined, calculated and configured
- > Kanban cards are printed and are ready for e-Kanban (Kanban ID and barcodes are already printed on the Kanban card)
- > Additional functions can be enabled very easily
- > New e-Kanban Modules can be installed and used based on the existing Smart Kanban package
- > Barcode Reader (optional with display or also PDAs) can be installed very fast and are ready to use at once

Smart Kanban reduces the implementation time of a Kanban system to a minimum!
