

## Our Kanban Workshops

Manual Kanban

Electronic Kanban

Advanced Kanban

### Our Kanban Workshops

A lot of companies are still at the beginning on their journey to "Lean Production". So they have less experience regarding PULL systems and Kanban.

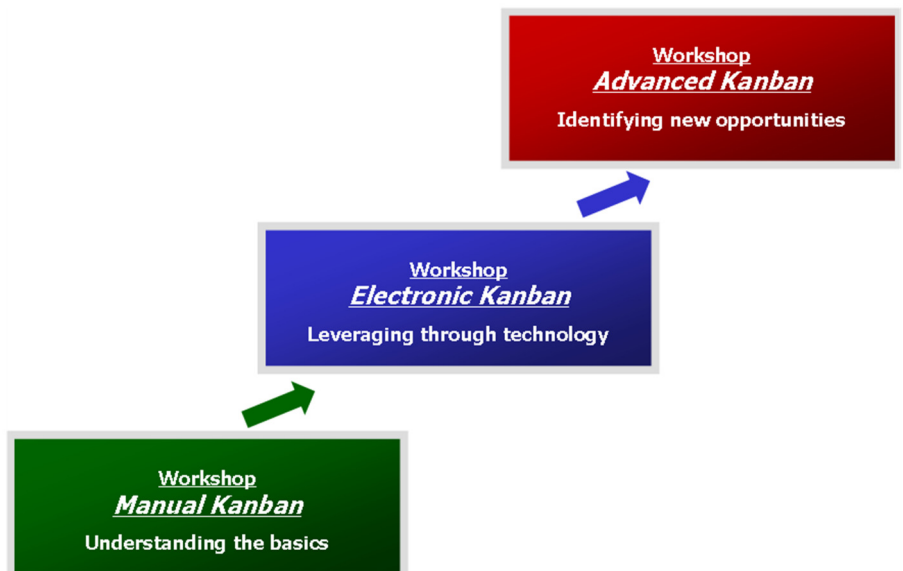

Other companies are using a classic manual Kanban system but they find many constraints or they are searching for a solution to improve the existing logistic processes and Supply-Chain.

When an electronic Kanban system is in place, it makes sense to review the existing processes from time to time and to start the "fine-tuning" of the e-Kanban system. Sometimes there are existing new customer requirements or a roll-out of the Kanban system has to be started.

### We will support you in all phases with our Kanban Workshops!

We offer three kinds of **Kanban Workshops** :

- > Workshop **MANUAL KANBAN**
- > Workshop **ELECTRONIC KANBAN**
- > Workshop **ADVANCED KANBAN**

## Workshop **MANUAL KANBAN - Understanding the basics**

This workshop helps to train the responsible persons in the topics like Lean Management, Pull systems and Kanban principles and to force the basic understanding of the basics.

- ✓ Lean Management and Kanban ? the Toyota Principle
- ✓ Analysis of PUSH versus PULL systems
- ✓ Basic principles of a Kanban system
- ✓ Strengths and weaknesses of a Kanban system
- ✓ Steps to implement a Kanban system
- ✓ Review of opportunities

## Workshop **ELECTRONIC KANBAN - Leveraging through technology**

This workshop helps to identify the potentials by using an electronic Kanban system instead of manual processes. Therefore the existing processes will be evaluated and we will define optimized e-Kanban processes together with the team. Additionally all customer requirements will be checked and possible solutions will be discussed.

- ✓ Benefits of electronic vs. manual Kanban
- ✓ Overview of IKS Integrated Kanban System
- ✓ High level client process mapping and identifications of opportunities
- ✓ Development of recommended e-Kanban processes for client
- ✓ Review of requirements to maximize e-Kanban system efficiency
- ✓ e-Kanban benefit and cost reduction analysis

## Workshop **ADVANCED KANBAN - Identifying new opportunities**

This workshop helps to review and optimize the existing processes continuously after an e-Kanban project has been closed. Additionally it would be possible to train new employees and to discuss new customer requirements.

The manufactus team will show you new ways and benefits based on improved e-Kanban functions and new e-Kanban software modules.

- ✓ Review of existing e-Kanban processes and performance evaluation
- ✓ Improvement recommendations for existing e-Kanban processes
- ✓ Review of new requirements and solutions development
- ✓ Development of new e-Kanban processes for other Kanban areas or new Kanban scenarios
- ✓ Analysis of additional e-Kanban benefit and cost reduction analysis
- ✓ Overview of additional IKS modules

### **About manufactus**

manufactus designs and develops innovative software solutions to optimize production and logistic processes.

Our goal is to supply software tools to support internal production processes, optimize the supply chain and to enable the customer to improve the processes continuously. Hereby we strongly support the principles of Lean Manufacturing, Kanban and the Toyota Production System.
