

Quotations of our customers

Here are some customer quotations regarding our e-Kanban System IKS

Mr. Michael Anke, Strategic Material Management
beyerdynamic, Heilbronn, Germany

"...it is important that all key persons of the company (General Manager, Logistics Manager, Production Manager etc.) are convinced about the Kanban system. The practice has demonstrated that the promised positive effects by using the IKS software came true. At the moment we have linked 23 external suppliers to our Kanban system and we will increase this number continuously."

Mr. Dirk Kohl, formerly Materials and Logistic Manager
Sunrise Medical, Malsch/Heidelberg, Germany

"All relevant Kanban processes must be easy to use and absolutely clear for everybody, means "easy to do". We have chosen IKS because the software supports the PDCA quality cycle and is a great tool to support the continuous improvement process (Kaizen) of our Kanban system."

Mr. Ralf-Thomas Hörtz, General Manager
HANSA Cesko (Hansa Metallwerke, Czech Republic)

"...an IKS highlight is the great and easy visualization of inventory and lead-times which helps to optimize inventory level without getting the risk of a material shortage."

Mr. Ralf Kästner, Mr. Jürgen Ernst
Manager Assembly, Manager Logistic
Maschinenfabrik Gerd Mosca, Waldbrunn, Germany

"The e-Kanban system IKS has a very clearly arranged user interface, is easy to use and the implementation of the system is very simple. New employees can be trained easily and the used processes are clearly structured."

"With IKS we have chosen a system which helped us to improve the material management at the shop-floor and at the assembly lines continuously during the last years."

Hier noch einige Meinungen unserer internationalen Kunden:

Mr. Tony Vorley, formerly Business Information Systems Director
Pirelli Tyres Limited, UK

"IKS helps Pirelli to maintain its grip on the road to Lean Manufacturing."

"IKS is the best electronic Kanban system available. It was designed and optimized by Kanban specialists. It is not an afterthought add-on to an ERP system."

Mr. Luis de Leon, formerly Senior Operations Manager Asia
Flextronics International

"This system is so visual and easy to understand that even a manager can use it!"

"With our MRP system we were expediting 1-3 part shortages per day on our primary product line. Since IKS implementation we have gone 3 consecutive months without a single shortage!"

... and one year later: "We had been experiencing repeated down time due to fabricated part shortages in final assembly using MRP. Now that we have switched to IKS we have eliminated internally fabricated part shortages completely!"

Mr. Fabian Vazquez, Mr. Angel Espinoza, Lean Implementation Managers
Navistar, USA/ Mexcio

"IKS has been a great tool in our Lean Journey, it helped us to reduce inventory and it improved the Kanban system at our assembly plants. The e-Kanban module is now been used by 20 suppliers that are shipping to our facilities on a just in time basis, replenishing only what has been consumed. IKS technical support is excellent, they helped us to customize IKS to our company needs."

"IKS is an easy and user friendly software."
